ToughSonic® REMOTE 30 Level Sensor

Level & Distance Data Collection for Remote Monitoring

REMOTE Series

Connect to one sensor or up to 32 sensors in an RS-485 network group. Whether your data needs are simple or complex this sensor can handle them. Connect with displays, RTUs, PLCs, PCs or custom systems.

These all-weather sensors provide years of maintenance free service and survive submersion.

Communications

- Addressable Modbus RTU industry standard protocol is supported by PCs and most monitoring equipment.
- Protocol options also include simple ASCII or phased high tion for special applications.
- Baud rate selectable from 9600 to 115k to meet your needs.
- Operating mode can be either measure-on-poll or free-running. When free running the latest data is returned on poll. In either mode sensor data may be filtered or averaged by pre-selected algorithms.
- SenixVIEW software supports configuration and testing of one sensor or a group (network) of sensors. It also allows storage and recall of setups for fast sensor cloning (copying) to save time.

Features & Benefits

- Rugged Packaging contains electronics and cable potted into a stainless 316 housing for reliable performance in wet or dirty environments.
- control of sensor parameters to optimize performance in each application. Additional support features include data logging, statistics and output verification.

Distance Measurements are

- made without contact with the liquid or solid material and are:
- Long range, short dead band
- Unaffected by optical factors

- No warmup, ready to measure

Indoor & Outdoor

The REMOTE 30 offers high performance, medium distance measurement in challenging remote monitoring installations and many other environments.

Surge Protected for transients

- up to 7 kV on the data and power circuits -75%stronger immunity than CE EMC directives, for improved lightning resistance.
- 20% Lower Power consumption than our ToughSonic 30 for solar/battery installations.

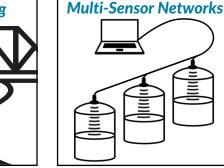

Some Example Applications:

- Irrigation control
- Open channel flow
- Flood monitoring
- Agricultural machine control
- Liquid tank networks SCADA* level sensing
- (*Supervisory Control and Data Acquisition)

- Smart Ultrasonics gives you
 - test features for installation and

- like color and transparency Narrow beam with adjustable
- sensitivity to suit your needs
- Temperature compensated
- within 1 second of power on

ToughSonic[®] REMOTE 30 Level Sensor

Optimum Range *	20 ft. (6.1 m)	Max Range *	30 feet (9.1 m)		
Deadband	Typ. < 10 in. (254 mm)	Beam Width	$7.5^{\circ} \pm 1^{\circ}$ off axis @ -3db		
Case Material	316 stainless steel	Configuration	Stored in sensor's non-volatile memory		
Temperature	-40 to 158 F (-40 to 70 C)	Data Output	Modbus, ASCII streaming, specials		
Humidity	0 to 100% operating	Transducer	75 kHz, Ruggedized Piezoelectric		
Compensation	Selectable temperature compensation	Protection	NEMA-4X, NEMA-6P, IP68		
Data Resolution	0.0068 in. (0.172 mm) per count	Adjustment	SenixVIEW PC Software		
Repeatability	Nominal 0.2% of range @ constant temp. Affected by target, distance, environment				
Update Rate	10 Hz (100 ms), SenixVIEW adjustable; also affected by SenixVIEW filter selections				
Modbus Protocol	Modbus RTU, 9600 to 115200 baud, 8 data bits, 1 stop, no parity				
ASCII Protocol	Five ASCII distance characters followed by Carriage Return; for single sensor connections only				
RS-485 Networks	From 1 to 32 sensors can operate in an addressable multi-drop network				
Ready time	< 1 second after power application				
Cable	2m standard length, potted into sensor body, PUR with shield and drain, other lengths available				
Conformance	CE, RoHS, Surge protection exceeds IEC 61000-4-5				
Target Requirements					
Objects	Detects liquid surface, flat or curved objects. Surface must reflect ultrasound to sensor				
Distance Ranges (*)	Affected by size, shape, orientation of target (sound level reflected back to sensor), environment				
	Restrict use to Optimum Range when using over a wide range of environmental conditions				
Orientation	Sensor should be oriented perpendicular to liquid surface for maximum reflection				
Optical	Unaffected by target color, light, transparency or other optical characteristics				

Connections

C	VA/Para	Decemberthere	Chart Area	Supply Current	
Connection	Wire	Description	Charchies	at 12 and 24 VDC input	
Power (**)	Brown	10-30 VDC @ 55 mA max	۰ ۲۵	at 12 and 24 VDC input	
	DIOMI	Typical: 35 mA @ 24 VDC			
Ground	Blue	Power & interface common	(mA)		
RS-232 out	Curry	Serial data connection	Current 20		
RS-485-	Gray	(depends on model)		Default Interval	
RS-232 in		Serial data connection	۸lddu		
RS-485+	Yellow	(depends on model)	dn <u>s</u>	12 VDC	
(**) Continuou	us measure	ements at default interval.	30 -	24 VDC	

(**) Continuous measurements at default interval.
Minimum 15 VDC input for optimum sensitivity.

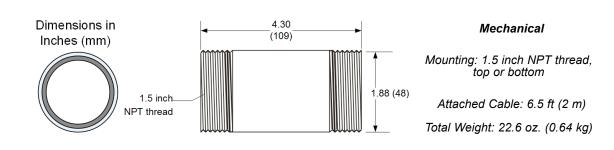

Part Numbers

Model Number U30-REMOTE-232 U30-REMOTE-485 Description Sensor with serial RS-232 interface (limited to single sensor connections) Sensor with serial RS-485 interface (allows addressable multi-sensor networks)

Senix also offers interconnection, communications, mounting, and display components
